

## Dr. Konstantin Korotkov

Dear friends! Let me invite you to the world of mysterious and attractive "living" glows - world of Bioelectrography. Opening this page, you not only get to know one of the scientifically-practical tendency, but unity with international intellectual union of people, who are forming new scientific and cultural paradigm. When we observe the play of light around human body, drop of water or crystal, we understand that everything in the world has interrelationship and any object - biological or inorganic - has its own inner energy. Understanding the fact that our life is not only material body and material existence but, first of all, it is energy, and therefore - Spirit, makes us have new attitude towards our everyday reality. When on real time we observe change of human biological field under influence of therapy, meditation, prayer, love, it makes us see the world round us with different eyes.

This site has several tasks. First of all, it is "first hand" information about Bioelectrography and what it studies. Second: information about new results, working out and achievements. A new article has been published; an interesting research has been done, a new program has been released - all this information appears in the site immediately. In our time it is probably the only way to get information about new material, appeared in Russia, USA or Slovenia. An important task: communication among specialist studying Bioelectrography from all over the world.

For the same purposes is created Forum, where you can just communicate with each other and find original materials from our colleagues from all over the world. It is clear that to write a good article and publish it in a prestigious magazine is quite a difficult task that can do easily mostly only professionals. In our site we can present interesting works without long process of official publication.

Finally, you will find a lot of interesting information, pictures, database of special cases, presentations and all this material can be loaded into your computer and use without any limits. The information given in the site belongs to everybody free of charge and free of copyrights. The world without borders and censorship! The only thing you cannot find in this site is commercial information. We represent St.Petersburg State Technical University of Informational Technologies, Mechanics and Optics and our field is scientific researches, intellectual and spiritual development. Without money it is impossible to live in this world, but earning money is the task of commercial organizations, which references you can find in our pages. This site is designed for people of different level: for those who are just interested in new tendencies, specialists who work with methods of Bioelectrography, medical doctors, practical workers and researchers. That is why the information is given according to hierarchical order:

The first level - general content of the page, the next - more detailed information, the following- specific moment for specialists. Deeper you go to the levels - more detailed and specific materials are given there. And as any work, it is far from perfection, that is why we are looking forward to your observations, advice, your active participation that let us form these pages more interesting and useful.

I wish you health, success in creation and let your Aura glow!

Yours sincerely, Konstantin Korotkov

Curriculum Vitae Konstantin G. Korotkov  
 KONSTANTIN G. KOROTKOV,  
 Ph.D., Professor

Konstantin Korotkov has the following positions:

Deputy Director of Saint-Petersburg Federal Research Institute of Physical Culture.

Professor of Computer Science and Biophysics at Saint-Petersburg Federal University of Informational Technologies, Mechanics and Optics.

Member of the Federal Russian University Scientific Board on new medical technologies.

Consultant for Estee Lauder and Aveda Co (USA).

CTO of the "Energy Information Technologies, Inc" (USA).

He has published over 200 papers in leading journals on physics and biology, and he holds 15 patents on biophysics inventions. Prof. Korotkov has led a research career for over 30 years, combining rigorous scientific method with an insatiable curiosity about things of the spirit and the soul with deep respect for all life. He is also a scholar in philosophy and a serious mountaineer of 25 years experience. He has given lectures, seminars and training sessions in 43

countries, presenting papers and workshops at more than 100 national and international conferences.

He is the author of 7 books, some in English, including *Light After Life: Experiments and Ideas on After-Death Changes of Kirlian Pictures*, USA 1998, *Aura and Consciousness – New Stage of Scientific Understanding*, Russian Ministry of Culture. 1998, *Human Energy Fields: Study with GDV bioelectrography*, USA 2002, *Spiral Traverse*, 2006. An editor of the book: *Measuring Energy Fields: State of the Art. GDV Bioelectrography series.. USA, 2004*. Several books are published in Italian, German, Spanish and French.

At the V Congress of the International Union of Medical and Applied Bioelectrography (IUMAB) in Curitiba, Brasil, in 2001, Dr.Korotkov was elected as President of the IUMAB by the world’s most prominent researchers. He was re-elected as a President in 2005. He is a Member of the Federal University Scientific Board on new medical technologies, Member of the Scientific Board of the European Society of Predictive Medicine (France) and of the Editorial Board of the «*Journal of Alternative and Complementary Medicine*» (USA).

His scientific line, known as the Electrophotonics, is based on Gas Discharge Visualization technique (GDV), is a breakthrough beyond Kirlian photography for direct, real-time viewing of the human energy fields. This new technology allows one to capture by a special camera the physical, emotional, mental and spiritual energy emanating to and from an individual, plants, liquids, powders, inanimate objects and translate this into a computerized model. This allows researcher and client to see imbalances that may be influencing an individual’s well-being greatly facilitating the diagnosis of the CAUSE of any existing imbalances showing the area of the body and the organ systems involved. One of the greatest benefits to date is the ability to do “real-time” measurements of a variety of treatments for such conditions as cancer to determine which is the most appropriate for the client. The incredible implications for the diagnosis and treatment of physical, emotional, mental and spiritual conditions with applications in medicine, psychology, sound therapy, biophysics, genetics, forensic science, agriculture, ecology etc. have only just begun.

The GDV technique is accepted by Russian Ministry of Health as a Medical technology and certified in Europe, more than 1000 doctors, practitioners and researchers benefit from using this technology worldwide. More than 150 papers published on GDV in different countries.
